

# SAOLA CONSERVATION JOB OPPORTUNITIES

As the Saola Conservation Programme moves into an exciting new phase there are opportunities for two senior staff to work in the new Saola and Endangered Ungulate Conservation Breeding and Rescue Centre in the Bach Ma National Park, Vietnam

The project is looking for a **Manager** and a **Veterinarian** to oversee the development of the new breeding centre and to then lead the process to capture wild saola and ensure their best long term care as part of a wider conservation programme for saola and other ungulates in the region, including the large-antlered muntjac.

This presents an exciting and unique opportunity as part of a small team to make a significant contribution to the survival of one of the rarest large mammal species in the world in a country rich in biodiversity.

The project is an initiative of the IUCN Asian Wild Cattle Specialist Group and the Saola Working Group supported by the Governments of Vietnam and Laos

Please send your CV (with two references, one current) and a covering letter to:
